FCC MAIL ROOM

10 September 2000

Ms. Magalie Roman Salas
Secretary
Federal Communications Commission
445 12th St., S.W.
Washington, DC 20554

Re: Ultra-Wideband
ET Docket 98-153

Dear Ms. Salas:

I am writing to you in response to the FCC's Notice of Proposed Rule Making on ultra-wideband radio.

The mission of the Office of Law Enforcement Technology Commercialization (OLETC) is to develop and deploy an active, broad based, national program to assist in the commercialization of innovative technology for use by the law enforcement and corrections community.

Nonintrusive concealed weapons and contraband detection has been identified as an area of priority interest for the development of advanced technologies for use in law enforcement and corrections.

The development of the ultra-wideband (UWB) technology could provide technologist with additional opportunities for advanced product development for use by the officers of state and local law enforcement and corrections agencies.

Sincerely,

F. Wayne Barle
Project Manager
